ABSTRACT

This compilation of Federal, State, and local aid available to nonpublic schools emphasizes State-aid programs. The data, obtained from responses by 50 chief budget officers to a questionnaire, are presented in the form of three charts. Chart I covers the status of State aid to nonpublic education for fiscal year 1972; Chart II sets forth expenditures on nonpublic education by State for fiscal years 1970-71 and 1972; and Chart III is a nationwide summary of State expenditures by program type for fiscal years 1970-71 and 1972. Because dollar amounts were available from only 64 of the 123 programs identified, it is concluded that the national total of State expenditures on aid to nonpublic schools is greater than that reported. A summary of the State aid programs to nonpublic education, a listing of local aid program types, and an appendix display of the survey questionnaire and aid form definitions complete the report. PUBLIC AID TO NONPUBLIC EDUCATION

PREPARED BY
COMMISSION STAFF

AA 000 795

Submitted to The President's Commission on School Finance

THIS IS ONE OF SEVERAL REPORTS PREPARED FOR THIS COMMISSION. TO AID IN OUR DELIBERATIONS, WE HAVE SOUGHT THE BEST QUALIFIED PEOPLE AND INSTITUTIONS TO CONDUCT THE MANY STUDY PROJECTS RELATING TO OUR BROAD MANDATE. COMMISSION STAFF MEMBERS HAVE ALSO PREPARED CERTAIN REPORTS.

WE ARE PUBLISHING THEM ALL SO THAT OTHERS MAY HAVE ACCESS TO THE SAME COMPREHENSIVE ANALYSIS OF THESE SUBJECTS THAT THE COMMISSION SOUGHT TO OBTAIN. IN OUR OWN FINAL REPORT WE WILL NOT BE ABLE TO ADDRESS IN DETAIL EVERY ASPECT OF EACH AREA STUDIED. BUT THOSE WHO SEEK ADDITIONAL INSIGHTS INTO THE COMPLEX PROBLEMS OF EDUCATION IN GENERAL AND SCHOOL FINANCE IN PARTICULAR WILL FIND MUCH CONTAINED IN THESE PROJECT REPORTS.

WE HAVE FOUND MUCH OF VALUE IN THEM FOR OUR OWN DELIBERATIONS. THE FACT THAT WE ARE NOW PUBLISHING THEM, HOWEVER, SHOULD IN NO SENSE BE VIEWED AS ENDORSEMENT OF ANY OR ALL OF THEIR FINDINGS AND CONCLUSIONS. THE COMMISSION HAS REVIEWED THIS REPORT AND THE OTHERS BUT HAS DRAWN ITS OWN CONCLUSIONS AND WILL OFFER ITS OWN RECOMMENDATIONS. THE FINAL REPORT OF THE COMMISSION MAY WELL BE AT VARIANCE WITH OR IN OPPOSITION TO VIEWS AND RECOMMENDATIONS CONTAINED IN THIS AND OTHER PROJECT REPORTS.

GENERAL COMMENTS

GENERAL COMMENTS

The issue of public aid to nonpublic schools and students is often expressed as the question: "Should such aid be provided?". The fact of the matter is that public dollars are now being spent at every level of government to provide support to students who attend nonpublic schools.

Accompanying charts indicate an expenditure of $99 million of Federal aid and $273 million of State aid. This is not the total picture. It represents only the estimated amounts for those programs, both State and Federal, for which data was available. Local expenditure data is not available. It can be assumed that the actual amount for Federal, State, and local aid to nonpublic schools is significantly greater.

The aid forms vary greatly in amount depending on eligibility for Federal programs and the existence of State or local aid grants or services.

A complete look at public aid to nonpublic elementary and secondary education requires that each level of government be viewed separately. This report is therefore divided into Federal, State and local sections.

STATE AID PROGRAMS

October, 1971

INTRODUCTION

INTRODUCTION

There have been many conflicting reports regarding the support that the States are providing to the nonpublic schools. The President's Commission on School Finance, therefore, conducted a survey (June - October, 1971) to develop an up-to-date and valid estimate of the amounts of state aid involved. It was decided to survey the 50 chief budget officers, believing them to be in the best position to identify the most accurate data available. The Commission was assisted in the distribution of the survey by the Council of State Governments.

Exhibit I, contained in the Appendix of this section, is the questionnaire which was distributed to the 50 States. This includes a definition for each of the 19 forms of aid to nonpublic schools listed on the questionnaire and used throughout this section. All the data contained in the section is based entirely on responses from the states.

It must be recognized that this section is concerned only with state aid programs. We have attempted to indicate all programs which are either totally or partially financed by state funds. Any program that is supported solely by federal or local money has been purposely eliminated.

Chart I is designed to give an overview of the status of state aid to nonpublic schools for Fiscal Year 1972 indicating the various aid forms and where they are in operation.

The purpose of Chart II is to show the amount of money spent by each state on aid programs to nonpublic schools for the three fiscal years surveyed ('70, '71, '72). It must be made quite clear that in many instances

457-211 O - 72 - 2

the state figures shown are not complete totals for all operating programs. There are numerous cases where a state has enacted an education program for both public and nonpublic school students or when a public school program has been made available to nonpublic school students (i.e. health services, transportation, driver education, dual enrollment). Accounting procedures are such that the portion of state funds spent for nonpublic school students cannot be separated out from the total expenditure on the program. Therefore, any analysis of this Chart must be made in the light that the state figures shown represent only that portion of the total funds going to nonpublic schools or their students which the budget officers could accurately identify.

Chart III gives a nationwide summary of state expenditures by program type for the three fiscal years surveyed. The grand total for those programs which have had amounts identified are:

Fiscal 1970	$109,401,000
Fiscal 1971	173,678,000
Fiscal 1972	273,286,000

Again one must view these figures with caution in order not to draw a fallacious conclusion. Our totals represent only those expenditures which could be accurately accounted for. For example in Fiscal 1972, 21 states reported some type of bus transportation for nonpublic school students, but only 8 states could accurately estimate the cost; therefore, our total of $46,214,000 represents the cost of only 8 of the 21 programs. For all states, 123 programs have been identified, but dollar amounts are available only for 64. We must, therefore, conclude that the national total of state expenditures on aid to nonpublic schools is greater than what we report.

The body of this section has been arranged alphabetically by state. We have briefly described each type of aid program in operation in the state and indicated the expenditure where this information was available.

NONPUBLIC SCHOOL FACILITY LEASE In cases where insufficient public schools were available, towns leased nonpublic school facilities and operated them as public schools. This has been true especially in areas where nonpublic schools ceased to operate.	The cost of said leases constitute a part of the "reimbursable expenditures" for which a city or town is reimbursed under the State Aid Formula.		
TRANSPORTATION Pupils who, in the fulfillment of the compulsory attendance requirements, attend private schools of elementary and high school grades so approved shall be entitled to the same rights and privileges as to transportation to and from school as are provided by law for pupils of public schools and shall not be denied such transportation because their attendance is in a school which is conducted under religious auspices or includes religious instruction in its curriculum.	Each of the 351 cities and towns receive reimbursement on a per pupil and mileage basis. Costing as to public school versus private school would be very difficult and expenditures for private school transportation are not available.

TEACHER SALARY SUPPLEMENTS Every nonpublic school teacher (grades 1-8) shall, upon his or her request, be paid by the State through the Commissioner of Education a salary supplement of 15% of his or her current salary, which salary, including the supplement, is not in excess of the average maximum salary paid to public school teachers in the State as determined by the Commissioner of Education. These teachers must meet certain qualifications.	$175,000.00	$195,000.00	$200,000.00
PUBLIC SCHOOL TEACHERS IN NONPUBLIC SCHOOLS There are no specific laws which permit public school teachers to work in a nonpublic school. In those communities where the practice is currently being followed, it is assumed that it is legal.	NOTE #1 A number of local school districts have provided this service to nonpublic schools. There is no direct categorical state aid payment made for this purpose. However, under Rhode Island's Foundation Program (percentage equalizing formula), general purpose grants are made to each school district to reimburse the district for all expenditures made under the care and control of the school committee. It is impossible to determine the exact amount spent for nonpublic school students since there is no local accounting of these expenditures by type of pupil served.		
NONPUBLIC SCHOOL FACILITY LEASE PROGRAM This bill as permissive legislation offers the possibility of some relief to cities and towns in the difficulties arising from closings of nonpublic schools. Incidentally relief for nonpublic schools also results. Authority is given to lease buildings or parts thereof as public school property for the conducting of public school classes.		See Note #1

OTHER A 1971 amendment to the State Aid to Education Program that allows per pupil aid to be channeled to nonpublic schools through the public school system. State funds are currently distributed to Vermont public schools on the basis of pupil enrollment in a given school district. The nonpublic school segment is strictly on a local option basis and only 2 or 3 districts are doing it. The district pays to the nonpublic school a portion of the cost of nonsectarian teachers teaching nonsectarian subjects.			No records are kept.

NOTE: Originally all secondary education in the state was located in private academies which served a town or contiguous groups of towns. As public schools became commonplace the academies were gradually phased out in most areas, but there is still much sentimental and historical attachment to the concept. In addition, due to the rural nature of the state and the unequal distribution of population, many of the smaller towns cannot financially afford construction of a public high school, hence the academies provide an acceptable alternative. The academies are state supported inasmuch as they are designated by the towns as the secondary school for that district, and they receive tuition from the district on a per student basis. Since the districts in turn receive general state aid on the basis of pupil membership and local wealth, some of this state aid supports operation of the academies. The State exercises some power over curriculum and physical standard, but in all other respects these schools operate independent of public control.

DEFINITIONS

None - No state funded programs for nonpublic schools or their students.

Education Vouchers - In its simplest form a voucher plan may be described as a program which operates as follows: the state issues the voucher to parents, the parents take the voucher to the school of their choice, the school then returns the voucher to the state and receives a certain amount of cash based on some pre-determined formula. A number of variations are possible. They might include: educational allowances of equal amount for all nonpublic school students; allowances for the needy only, these would be usable in any approved nonpublic school; inverse sliding scale allowances which would be based on income and need factors.

Tax Adjustments - Tax adjustments would provide for reimbursement to the parent or guardian of a nonpublic school student of all or a part of the education expenses incurred. Reimbursement would be made through the state taxing mechanism (i.e. income or property tax credits or deductions).

Dual Enrollment - State funding of a program which allows for the sharing of the school time of children between public schools, which provide secular education in a denominationally neutral context, and nonpublic schools which may proceed with a specific denominational religious context. In the most common application children journey from a nonpublic school to a nearby public school for instruction in such subjects as science, home economics, industrial arts, business education, etc.

Purchase of Secular Services - Reimbursement by a state to a nonpublic school for part or all of the costs incurred in providing instruction in designated secular subjects (i.e. mathematics, modern foreign languages, physical science, physical education).

Teacher Salary Supplements - State funded salary supplements paid to nonpublic school teachers who meet specific requirements (i.e. state certification, teaching secular subjects).

Public School Teachers in Nonpublic Schools - A state funded program which provides for all or a portion of the costs of publicly employed full or part time teachers to instruct nonpublic school pupils in their own schools.

Nonpublic School Facility Lease Program - State reimbursement for the leasing of portions of nonpublic schools for use by the public schools for public education.

Administrative Services Reimbursement - Payment by the state to nonpublic schools for the expenses incurred in meeting state mandated administrative services to nonpublic school students (i.e. Payments to nonpublic schools based on a set daily cost for pupil accounting. This amount, multiplied times the number of pupils in the school inturn multiplied times the average number of days attended would equal the reimbursement).

Special Grants for Equipment - A state program of grants to nonpublic schools for the development and support of specific types of education through equipment purchase (i.e. reading laboratories, audio-visual equipment, language labs, scientific equipment, etc.).

Handicapped Children Assistance - Any state funded program which includes nonpublic school pupils who are deaf, blind, emotionally disturbed, crippled, or in any way physically handicapped.

Health Services - General health programs such as health examinations, hearing and sight testing, preventative medicine, health counseling and such others as provided for nonpublic school children by state law.

Transportation - State funded programs for the transportation of nonpublic school children from a pre-determined place at or near their homes to a point at or near their school and their return at the end of the school day.

Textbook Aid - State funded programs which provide for the purchase of textbooks or the loan of textbooks to nonpublic school students.

Per Pupil Grants - A state program of grants of money awarded on a per pupil basis. These grants might be made either to the student or nonpublic school and may or may not be earmarked for specific purposes.

Driver Education - Allowing nonpublic school pupils to participate in any public school program of driver education or any state sponsored driver education program given at the nonpublic school.

Student Loans - A state program which allows nonpublic school students to borrow funds to finance their education according to legislative regulations. This does not include loans for higher education.

Nutrition - State programs which provide for all or a portion of free or reduced cost milk, meals or other forms of nutrition to those students in nonpublic schools who qualify.

Other - Identify any state funded nonpublic school aid program in operation in your state which is not included in our list.

LOCAL AID PROGRAMS

LOCAL AID PROGRAMS

No valid data exists identifying the amount of local aid to nonpublic schools. In practice, however, there are probably more varieties of aid at the local level than at either the State or Federal level.

Indicated below are the various types of local aid programs that are available in one or more States throughout the country. It is also probable that, because of the flexibility at the local level, local school districts could be providing additional programs of nonpublic school aid similar to those of the State and Federal governments.

Types of Local Aid Programs

1. dual enrollment
2. administrative services reimbursement
3. education support services
4. transportation
5. health services
6. textbooks
7. special grants for equipment
8. driver education
9. nutrition
10. handicapped children assistance
11. nonpublic school facility lease programs
12. shared facilities
13. learning centers
14. public school teachers in nonpublic schools
